

SafeCare Census Reminder

Remember to enter your patient data
(acuity) during the following census
periods

AM: 07:00 – 08:30

PM: 13:00 – 14:30

Night: 19:30 – 21:00

The patient data should be input by the
person who has spent the longest time
with the patients in that period.

E.g., night staff would enter the AM
census as having been with the patients
overnight, they are best placed to score
their acuity.
