A high respiratory rate may indicate sepsis

  
Use of a non-rebreathable mask requires immediate medical review

  
Do not over oxygenate type 2 respiratory patients

  
Low blood pressure may indicate sepsis and poses a risk of acute kidney injury  
START A FLUID BALANCE (Corp/Proc/427)

  
Don't forget to check blood glucose if changes in AVPU present

  
Seek medical review if score of 3 in any single parameter
