## To disable autocomplete in Edge try the following:

- 1. Open Microsoft Edge.
- 2. In address bar type **Edge://flags** and press the **Enter** key.
- 3. At the top you can search for a setting. Search for **Show Autofill prediction.** Change its setting to **Disable** (see below)

zpenme	nts		96.0.1054.34
	Available	Unavailable	
how Autofill pre	edictions		

4. Again at the top search for **Substring matching for Autofill suggestions.** Change its setting to **Disable** (see below)

•	96.0.10
Available	Unavailable

6. You will now have to Restart Edge ( a button at the bottom right usually appears, click to do this. If not manually close all Edge windows and reopen)
