Simulation and Skills -
Mark Hatch/Neil
Berrigan/Steve Heald

General Practice - Dr Rees

Application Process - Mr Kidner

It was a wide range of departments which I enjoyed. I really enjoyed how most of the doctors explained the processes of their jobs and I loved the practical work in simulation.

Loved the programme, very grateful.

I really enjoyed this 3 day course. Thank you very much. The Simulation & Skills were very engaging and got me involved.

I thoroughly enjoyed this work experience programme. Being able to talk to other healthcare professionals and witness both difficult and positive scenarios.

One of my favourite aspects was the Emergency Department as I was able to witness how the doctors and nurses deal with stressful scenarios. Also the breadth of knowledge necessary for the job and the different cases that occurred. I would love the opportunity to complete work experience in another specialty as I feel I gained a lot from this experience.

It was very useful as we have been given a larger insight of the clinical environment, I enjoyed every aspect of the programme and I found it all extremely useful. The observation of the doctors and medical professionals was extremely helpful. In the CoOP ward we were able to speak to a 4th year student and doctor which gave us a larger understanding about life in the geriatrics ward. The 4th year university student on placement gave us a bigger insight on life in university. I thoroughly enjoyed the work experience, very useful.
