Our Four Values:

People Centred

Positive

Compassion

Excellence

LOOKING AFTER A CHILD WITH A BROKEN COLLAR BONE

A broken bone can be known as either a fracture, crack or break, all of these mean the same.

Your child has fractured his/her CLAVICLE (COLLAR BONE)

TREATMENT

The treatment for a fractured Clavicle is by a Broad Arm Sling'.

The sling must be worn under the clothes at all times.

You should give regular Paracetamol as advised to ease any pain.

The skin in the elbow crease and armpit (axilla) can get very sore so be sure to keep this area dry.

To wash under your child's arm, get him / her to lean forward and the arm will naturally move away from the body allowing you access.

Exercise is very important. You should encourage your child to regularly wriggle their fingers as soon as he / she is able to do so.

FOLLOW UP

Your child should be given an appointment for the next Fracture Clinic.

The Trust recognises the importance of multi agency working to safeguard children and young people.

If you are concerned about the welfare of a child or young person please contact Children's Social Care on:

For children living in the Blackpool area:

Monday – Friday 9.00am – 5.00pm
