- Journal of Infection

How using ClinicalKey within your specialty supports all work scenarios

Elsevier's global study* reveals that the way clinicians use information is complex.

To find a **quick answer** in between or during patient consultations (drug dosing, comorbidities...)

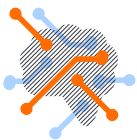

For **learning** purposes (my own learning...)

To **develop or confirm assessment and treatment plan** for a patient (guidelines, trial findings, images...)

For **teaching** purposes (teaching others, preparing lectures, preparing/reviewing exams, presenting to colleagues...)

To **keep abreast of the latest thinking** in a field of specialty (latest trial findings, launches, key opinion leader views...)

For **clinical research** (writing articles, developing protocols, for clinical trials...)

By providing multimodal, multiformat, reference materials, ClinicalKey plays a vital role in keeping clinicians abreast of the latest, most reliable knowledge and evidence across all usage cases.
